Scottish Housing Quality Standard (SHQS) – Stock condition survey information (Indicator C24)

Please state:

C24.1 The date your organisation's stock was last surveyed or assessed for compliance with the SHQS

March 2019

C24.2 What percentage of stock did your organisation fully assess for compliance in the last four years?

38.2

C24.3 The date of your next scheduled stock condition survey or assessment

April 2019

C24.4 What percentage of your organisation's stock will be fully assessed in the next survey

10

C24.5 How did your organisation use the survey data stated at C24.2 to establish how the stock complied overall with the SHQS

We carry out an annual stock condition / SHQS survey of 1/5 of our schemes each year. The survey requires a minimum physical survey of 10% of all properties within the schemes plus at least 1 of each house type, 10% of each house type where numbers allow. Typically this gives a survey rate of around 15 to 16% of the stock within the schemes being surveyed each year. In addition we carry out an SHQS survey of all properties when they become void throughout the year, if they haven't been surveyed within the last 2 years. New build properties are assessed for SHQS compliance through a desktop survey. All results are entered into an SHQS database to record compliance and any failures or exemptions.
